PORTFOLIOS

DEFENSIVE PORTFOLIO

The Defensive Portfolio is a blended style strategy. It is aimed at medium to long term investors who are seeking a cautious investment that has a genuine prospect of capital growth above cash based investments.

The Defensive Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 0%–35% sector. The Defensive Portfolio has a risk rating and investor profile of 2 out of 10.

CAUTIOUS PORTFOLIO

The Cautious Portfolio is a blended style strategy. It is aimed at medium to long term investors who are seeking a relatively cautious investment that has a genuine prospect of capital growth.

The Cautious Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 0%–35% sector. The Cautious Portfolio has a risk rating and investor profile of 3 out of 10.

CONSERVATIVE INCOME PORTFOLIO

The Conservative Income Portfolio is a value style income and growth strategy. It is aimed at medium to long term investors who are seeking a sustainable level of income within a cautious to balanced portfolio along with a genuine prospect of income and capital growth.

The Conservative Income Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 20%–60% sector and has a risk rating and investor profile of 4 out of 10.

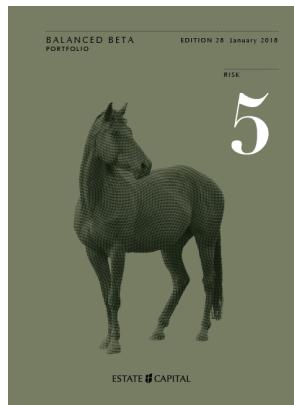

Overview

CONSERVATIVE ALPHA PORTFOLIO

The Conservative Alpha Portfolio is an active growth style strategy. It is aimed at medium to long term investors who are seeking above average capital growth from a diversified portfolio.

The Conservative Alpha Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 20%–60% sector and has a risk rating and investor profile of 4 out of 10.

BALANCED BETA PORTFOLIO

The Balanced Beta Portfolio is a passive growth strategy. It is aimed at medium to long term investors who are seeking above average capital growth from a balanced portfolio of mainly equity investments.

The Balanced Beta Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 20%–60% sector and has a risk rating and investor profile of 5 out of 10. The Balanced Beta Portfolio is the Estate Capital default portfolio for regular pension contributions.

BALANCED INCOME PORTFOLIO

The Balanced Income Portfolio is a value style income and growth strategy. It is aimed at medium to long term investors who are seeking a sustainable level of income within a balanced portfolio along with a genuine prospect of income and capital growth.

The Balanced Income Portfolio performance is benchmarked against the average performance of the IA Investment 20%–60% sector. The Balanced Income Portfolio has a risk rating and investor profile of 6 out of 10.

BALANCED ALPHA PORTFOLIO

The Balanced Alpha Portfolio is an active growth style strategy. It is aimed at medium to long term investors who are seeking above average capital growth from a balanced portfolio of mainly equity investments.

The Balanced Alpha Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 40%–85% sector and has a risk rating and investor profile of 6 out of 10.

SPECULATIVE BETA PORTFOLIO

The Speculative Beta Portfolio is an active growth strategy. It is aimed at medium to long term investors who are seeking above average capital growth from a balanced portfolio of mainly equity investments.

The Speculative Beta Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 40%–85% sector and has a risk rating and investor profile of 7 out of 10.

SPECULATIVE ALPHA PORTFOLIO

The Speculative Alpha Portfolio is a growth style strategy. It is aimed at medium to long term investors who are seeking above average capital growth from a speculative portfolio of mainly global equity investments.

The Speculative Alpha Portfolio performance is benchmarked against the average performance of the IA Mixed Investment 40%–85% sector and has a risk rating and investor profile of 8 out of 10.

ASSET ALLOCATION

Investment Portfolios

The Estate Capital Investment Portfolios offer nine model investment strategies aimed at medium to long term investors who seek capital growth and income from a portfolio of leading investment funds. The portfolios can be used in full or as a core holding in a broader bespoke portfolio.

The portfolios offer access to highly rated leading investment fund managers who have in the past provided above average returns. The individual funds that make up our diversified portfolios are selected upon the quality of the fund manager and the consistency of past performance.

Investment Diversity

There is a wide range of asset classes across global markets available to investors. Our Portfolios bring together a diversity of:

- Equities
- Fixed Interest Securities
- Commercial Property
- Commodities
- Alternative Investments
- Cash

The global balance of investment across differing asset classes is a primary driver of portfolio return and enhanced security.

Active Funds - Alpha Portfolios

Our active investment portfolios bring together a blend of the leading UK fund managers. The managers we select represent the best in their asset class. Active investment managers will seek to outperform their sector average through their analysis and understanding of the market.

Active management is implemented through either a growth or value strategy. Growth funds seek outperformance through stock selection based upon growth potential and momentum. Value funds seek outperformance through the selection of unpopular and undervalued stock that in time recover their true market value.

Passive Funds - Beta Portfolios

Passive funds replicate the stockholdings of an underlying index, such as the FTSE 100. Since these funds track the composition and performance of the underlying index, there are lower levels of management and trading activity and so the funds have a lower total expense ratio. We offer both a predominantly passive balanced and speculative portfolios.

Risk Related Returns

An important decision when constructing a suitable investment portfolio is the level of risk you are prepared to accept. Risk is an unavoidable feature of all investment. As investment takes place amid uncertainty, investors need to take account of risk in their search for capital growth.

Once the acceptable level of market risk has been decided, the optimal mix of assets for a given risk profile can be identified. This is asset allocation.

Asset Allocation

It is commonly agreed from established research that asset allocation provides for the majority of total return for a managed investment portfolio. Asset allocation is the main driver of portfolio performance. It is more important than fund selection or market timing.

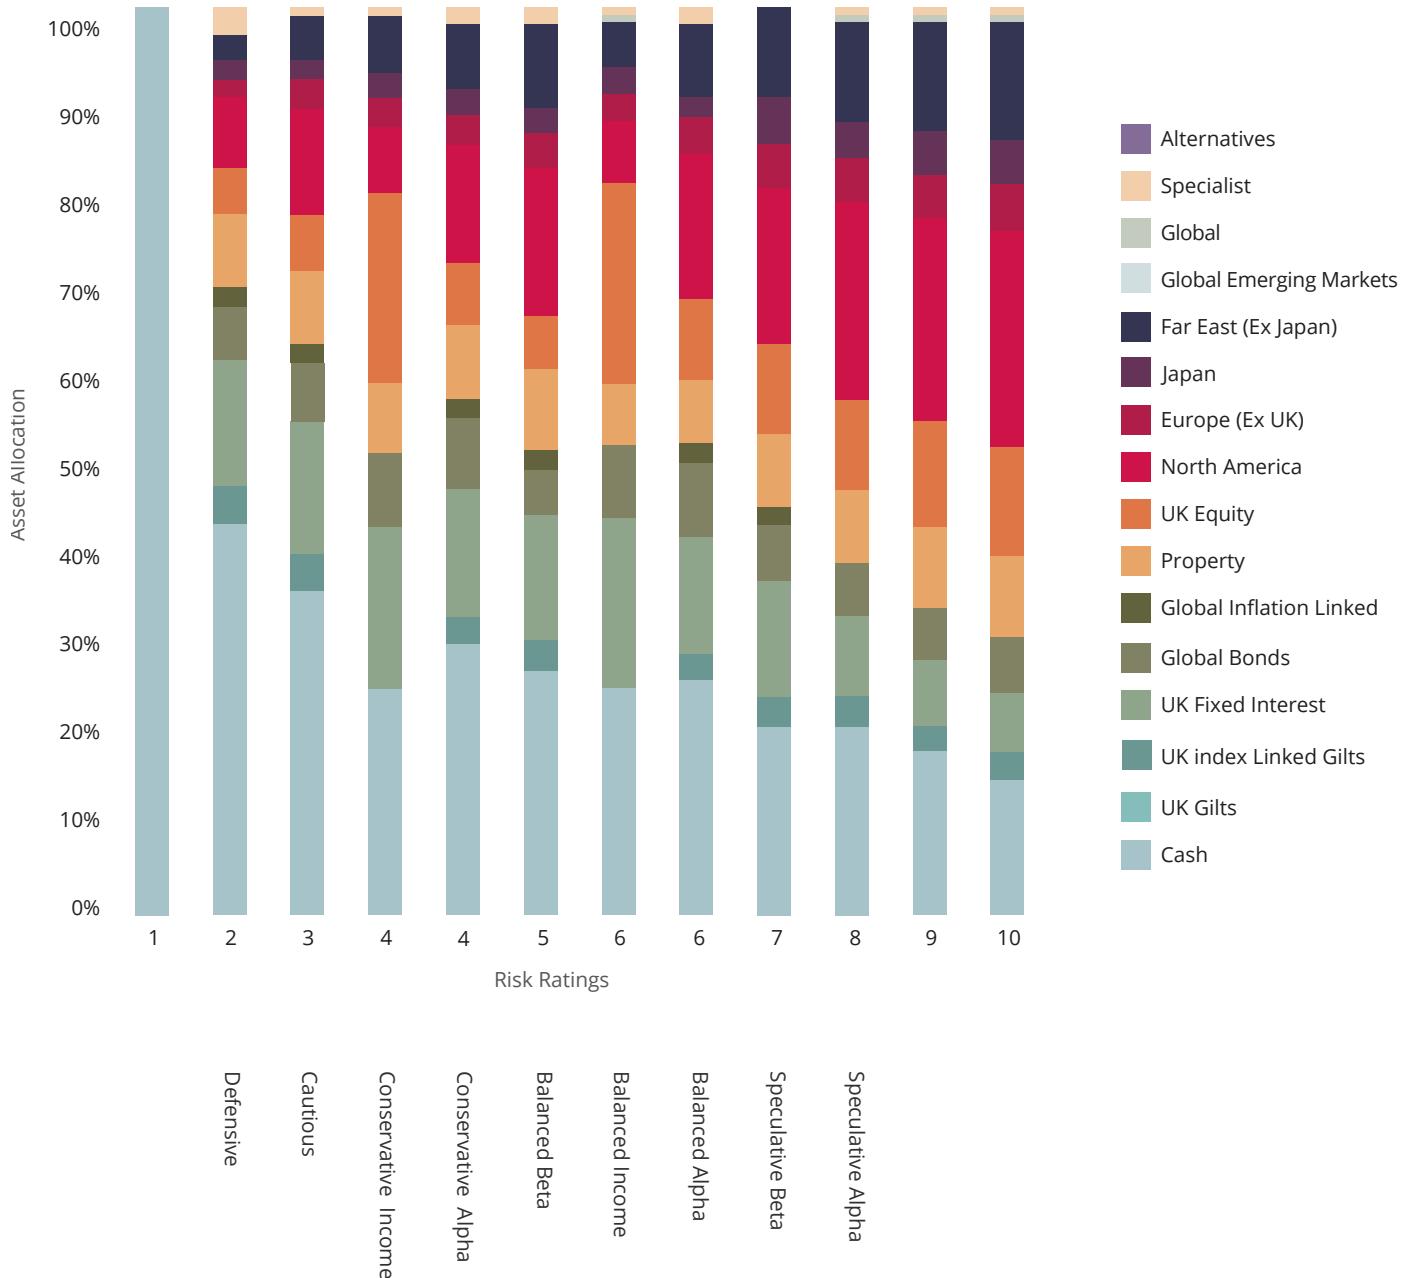

In order to reduce overall risk, a portfolio should seek to diversify its holdings across various types of investments, alternative areas of business and differing parts of the world economy. Individual ups and downs are cancelled out within a sufficiently diversified portfolio therefore reducing risk and driving return.

Risk Related Asset Allocation

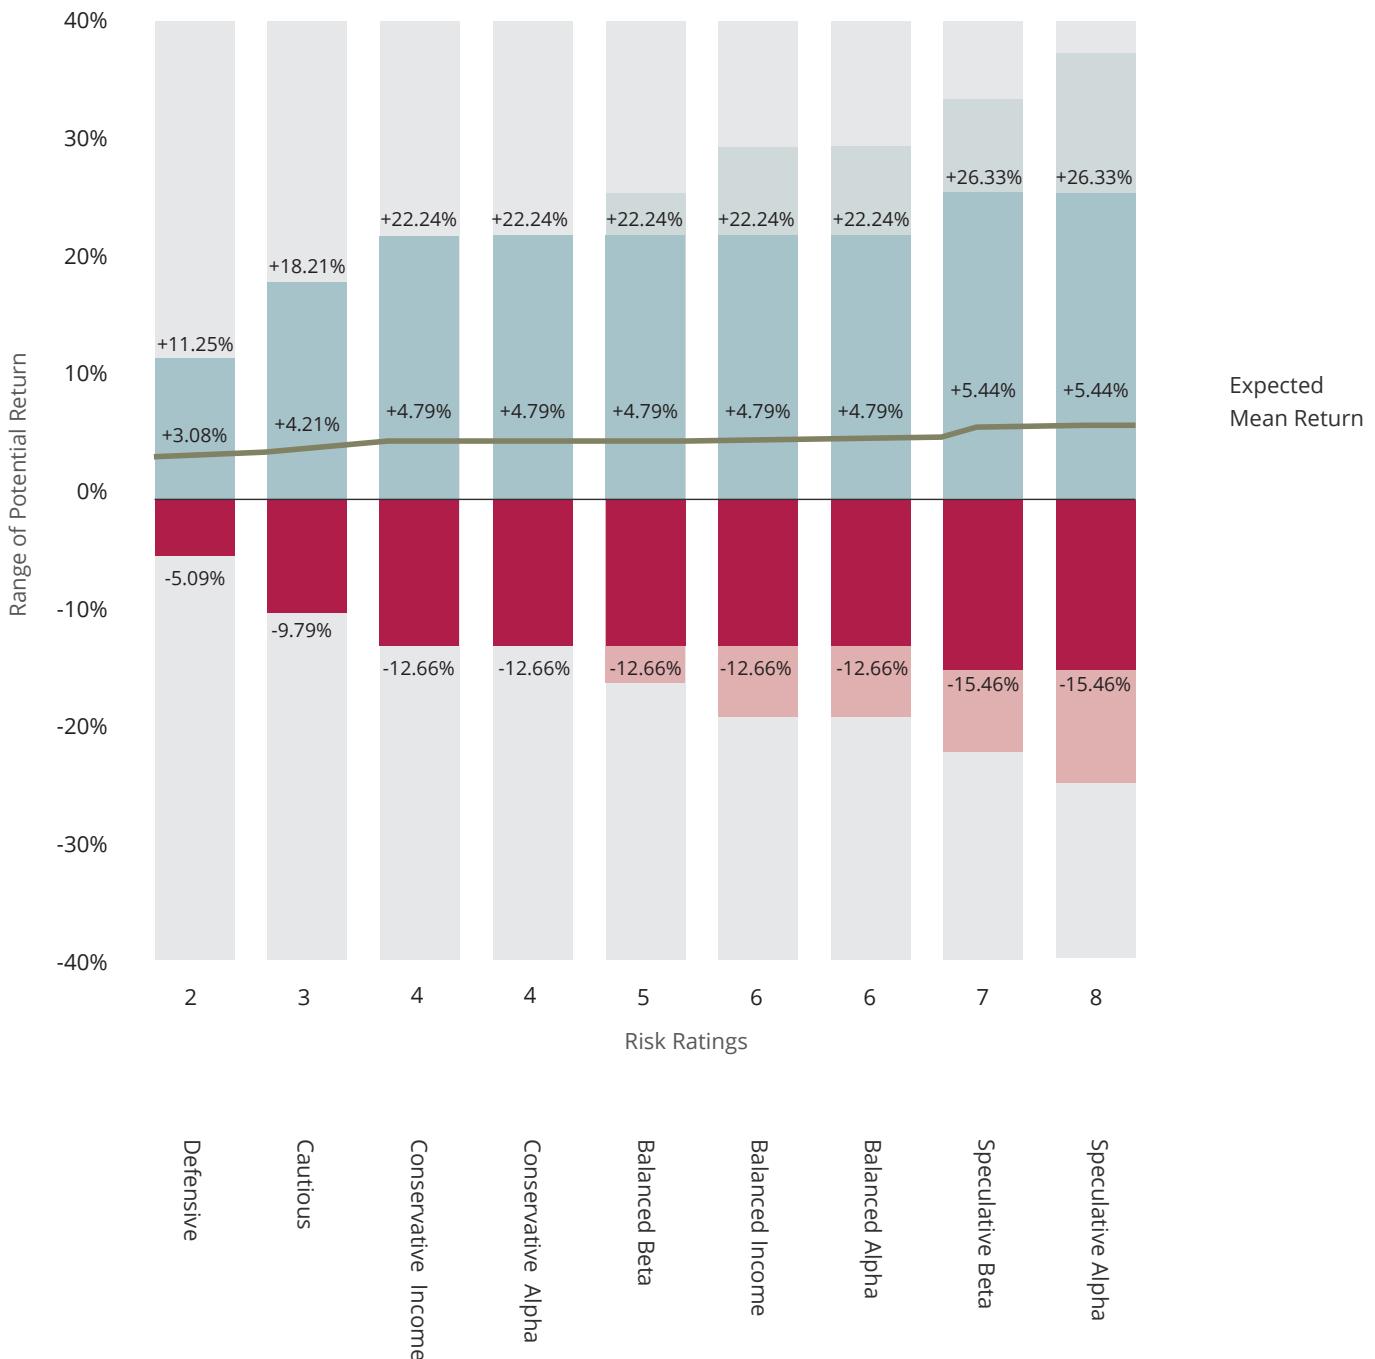

It is for these reasons that we have built our own risk related asset allocation graph to identify efficient portfolios. The Asset Allocation Graph identifies a suitable split of diversified assets for each risk tolerance.

The graph gives our current risk related asset allocation for a growth investor. The asset allocations are for risk levels 1 to 10, with 1 being the most cautious and 10 being the most speculative. These asset allocations are reviewed periodically and are subject to change.

Risk Related Asset Allocation

FUND SELECTION

Fund Management Rating Agencies

The quality of fund management will have significant influence upon likely future returns. There are a number of independent research companies that conduct detailed due diligence and risk analysis on investment funds. These fund rating agencies provide a reliable resource to identify well managed index tracking funds. We use Morningstar Analysts Ratings and Rayner Spencer Mills Research for this work.

We filter the entire listing of UK retail investment funds by preferring funds that are rated Gold or Silver by Morningstar Analysts and are Rated by Rayner Spencer Mills. We will accept a Bronze rated fund to provide a required market exposure.

Rayner-Spencer Mills Research

Rayner Spencer Mills operate both a quantitative and qualitative measure in order to rate an investment fund. After initial screening for acceptable risk and performance characteristics, funds are judged upon:-

- Acceptable risk and reward parameters.
- Robust fund management processes.
- A strong management team.
- Total expense cost ratios.
- Fund size.
- Fund manager's background.
- Fund philosophy.
- Fund manager's process and resources.
- Overall risk control.

Rayner Spencer Mills include property funds in their ratings.

Successful funds are awarded a **Rated** status. This rating is reviewed every three months.

Source: Rayner Spencer Mills website and publications.

Morningstar Analyst Ratings™

The Morningstar Analyst Ratings for investment funds is the summary expression of a forward looking analysis of the fund. Morningstar Analyst ratings are assigned to funds on a five tier scale running from Gold to Negative. The top three ratings, Gold, Silver and Bronze all indicate that their analysts think highly of the fund. The differences between them correspond to the level of analyst conviction in the funds ability to outperform its benchmark and peers within the context of the level of risk taken. The five pillars of success that funds are judged against are:-

- The quality of the investment team.
- Investment processes and performance objective.
- Parent organisation.
- Performance.
- Price.

Morningstar Analyst Ratings include passive funds in their ratings.

Gold Rating – These funds are the highest conviction recommendations and stand out as best of breed for their investment mandate. To earn a Gold rating, a fund must distinguish itself across all the five pillars of success that are the basis of the analysis.

Silver Rating – Funds that fall into this category are high conviction recommendations. They have notable advantages across several but perhaps not all of the five pillars.

Bronze Rating – These funds have advantages that clearly outweigh any disadvantages across the pillars, providing a conviction to award a positive rating.

Investment Performance

Consistent performance figures do not lie and quality fund management will express itself in above average and top quartile returns. We therefore point score quartile performance over 1 year, 2 years and 3 years, with a weighting to recent performance. We also point score 3 year, 5 year and 10 year actual average growth rates to reward long term consistent performance.

Quartile rankings are based on discrete performance over the specified measured period to month of publication on a sell to sell income reinvested basis. Fund and trust yields are based upon the gross dividend prediction of the fund manager.

Financial Express Crown Fund Ratings

The FE Crown Fund Rating™ enables investors to distinguish between funds that are consistently outperforming their respective benchmarks. The ratings take into account three key measures that influence overall performances:

- Stockpicking.
- Risk control.
- Consistent outperforming of relevant benchmarks.

The methodology does not simply identify the best performers but those who achieve their results in a solid and intrinsically valuable way.

5 Star	Top 10% of funds in sector
4 Star	Top 76-90% of funds in sector
3 Star	Next 51-75% of funds in sector
2 Star	Bottom 26-50% of funds in sector
1 Star	Bottom 25% of funds in sector

Source: Money Management and Financial Express Crown Fund Ratings

Fund Selection

The combined points score from several past quartile performance, actual annual and average growth rates from the past one, three, five and ten year performance, current yield and fund management confidence factors from leading fund rating agencies as well as the sharpe ratio, information ratio, alpha ratio and beta ratio for the selected funds will provide us with an overall merit rating. Each fund which passes through our initial screening process will receive a point score on our "Shortlist". The highest scoring funds are then usually but not exclusively selected into our "Purchase List" and then our portfolios.

Source: Money Management, November 2018. Morningstar website and publications.

Risk Rated Returns

All selected investment portfolios are given a risk rating from 1 to 10 in order to match Portfolio selection to attitude to risk and reward.

The value of capital and income arising from an investment is not guaranteed. Stock and unit prices may go up as well as down and an investor may not get back the amount originally invested. Capital is at risk.

Performance Measures

In order to demonstrate the competency and success of our investment portfolios, we benchmark each of our Portfolios against the most relevant sector average from the Investment Association (IA) Mixed Investment Sectors. The data collected gives a clear indication of success and relative performance against a recognised national performance measure. We publish our cumulative and discrete performances for the past five years every six months.
